

**STAINLESS STEEL
WIRE & BAR FOR FREE MACHINING**

BAR | WIRES | WELDING WIRES

EASY MACHINING, GREAT PRODUCTIVITY

Efficiency is crucial for the success of any machining business, with precise materials ensuring low cycle times and maximum repeatability. Stainless steel, despite higher machining costs, can be optimized with advanced techniques. With nearly thirty years of experience, Venus excels in producing precisely machined stainless steel bars, offering expertise and state-of-the-art equipment to enhance productivity in modern machining businesses.

Product features of wires

Size tolerance of h8, h9

Laser size reading chart available on request.

NDT tested for 100% crack free supplies on request.

Peeled or shaved Wire Rod on request.

Value Addition

Minimal Downtime

Shorter Machining
Cycle Time

Minimized Machine
Vibrations

No Chamfering Marks

Less Scrap &
Less Rework

Better Dimensional
Control with Perfect
Cross-Sectional Circularity

Greater Accuracy for Your
Finished Parts

Nearly zero Crack
Related Rejections
